Makes Up To  
800 Drenches or  
220 Gallons of  
Feeding Mix

# B

®

# HEALTHY

## *The Original*

## Feeding Stimulant

## With

## Essential Oils!

## Helps Your Hives to Thrive!®

## 1 Gallon (3.78 Liters)

Made in USA

**Uses:** As a feeding stimulant during early spring, fall or dearths of nectar. Helps when used as a spray in sugar water instead of smoke to calm bees and to combine weak colonies. Also, spraying on new plastic foundation encourages acceptance.

**DIRECTIONS: SHAKE WELL BEFORE USING. KEEP FROM FREEZING. FEED WITH HONEY SUPERS REMOVED.**

A Gallon pail makes up to 800 drench treatments at 1-Gallon Honey-B-Healthy® per 55 gallons sugar syrup or 220 gallons of feeding mix at 1 quart Honey-B-Healthy® per 55 gallons sugar syrup; for smaller mixes use 1 tsp. (5ml) to 2 tsp. (10ml) per quart for feeding and 4 tsp./20ml per quart for drenching. As a spray to calm bees or to entice bees to work plastic foundation, use the drench dose. For drenching, apply 8 oz. more or less (depending on the size) of the colony 3 - 4 times a few days apart to the brood area by spraying or drizzling the mix on the bees and between the brood frames.

**Contains:** Sucrose, Water, Spearmint Oil, Lemongrass Oil, Lecithin, and Sodium Lauryl Sulfate.

**WARNINGS: KEEP OUT OF REACH OF CHILDREN. KEEP TIGHTLY SEALED. If accidentally ingested seek medical help. User assumes full liability of use.**
